

## Important information

Information's were mostly provided by various raw material manufacturers.

These values are based solely on *laboratory tests* with *raw materials*.

Plastic components produced from these *raw materials* are frequently subject to influences that cannot be recognized in laboratory tests (production process, temperature, pressure, material stress, effects of chemicals, chemical mixtures, etc.).

For this reason the values given are *only to be regarded as being guidelines*.

In critical cases it is *essential that a test is carried out first*.

No legal claims can be derived from this information; nor do we accept any liability for it.

A knowledge of the chemical and mechanical resistance alone is not sufficient for the evaluation of the usability of a product.

## Sources

The following tables "Chemical resistance of plastics" as well as the information about chemical resistance given in the particular product descriptions have been partially extracted from tables established by company Bürkle GmbH ,other sources and laboratory-tests driven by Knappe Composites SAS.

## Chemical resistance

Two values are given per substance

left number = value at +20°C / right number = value at +50°C.

0 no data available

1 resistant

2 practically resistant

3 partially resistant

4 not resistant

K no general information available

L danger of pitting or stress-cracking corrosion

( ) estimated value

## Hazard notes

E explosive

O oxidizing

F highly flammable

F+ extremely flammable

T toxic

T+ very toxic

C corrosive

Xn harmful

Xi irritant

N dangerous for the environment

## Description of the materials

### Thermoplastics

HDPE Polyethylene (high density)

LDPE Polyethylene (low density)

PA Polyamide (Nylon)

PC Polycarbonate

PETG Polyethylene terephthalate glycol (PET copolymer)

PMP Polymethylpentene (TPX)

POM Polyoxymethylene, polyacetal

PP Polypropylene

PS Polystyrene

PSU Polysulfone

PVC Polyvinyl chloride

SAN Styrene-acrylnitrile

### Fluoroplastics

E-CTFE Ethylene-chlorotrifluoroethylene (Halar )

ETFE Ethylene-tetrafluoroethylene

FEP Tetrafluoroethylene-perfluoropropylene (Teflon, FEP)

PTFE Polytetrafluoroethylene (Teflon)

PVDF Polyvinylidene fluoride

### Elastomers

EPDM Ethylene-propylene-diene rubber

FPM/FKM Fluorinated rubber (Viton)

NBR Acryl-nitrile-butadiene rubber

SI Silicone rubber

### Metals

Al Aluminium

V2A Stainless steel 1.4301 (AISI 304)

V4A Stainless steel 1.4401 (AISI 316)

Hastelloy C Nickel-chromium-molybdenum alloy
